

AFRICA LIVE!

SAN ANTONIO, TEXAS

SAN ANTONIO ZOOLOGICAL GARDENS

San Antonio Zoo is set among historic canals, towering trees, and exposed hillsides with rock bluffs. Africa Live! will encompass these low-lying wet and dry, hilly environments and display the ways that plants and animals have adapted to both the abundance and scarcity of water.

The drama and milieu of east Africa will begin with underwater viewing of crocodile, hippopotamus, and fish. Then, through the surrounding forest edge, visitors will be treated to views of rhinos, gazelles, and duikers cavorting on the nearby hillside. An enormous aviary will house a kaleidoscope of birds and separate enclosures for leopard and colobus monkey. Visitors will depart through a thicket of acacia to close encounters with giraffe, zebra, and ostrich in an existing safari experience.

FACTS

- \$12 million
- Gift shop
- Conference center
- Food service and special event dining

BENEFITS

- Immersion in the world of Africa
- Educational opportunities
